

# Human Head Notes

## Self Portrait

1. Human head (HH) is shaped like an upside-down egg.

2. The eyes are located halfway between the top of the head and the bottom of the chin

3. The HH is 5 eyes wide.

4. There is 1 eye width between eyes.

5. The base of the nose is located halfway between the eyes and the bottom of the chin.

6. Straight lines down from the tear ducts touch the sides of the nose.

7. The bottom lip is halfway between the bottom of the nose and bottom of the chin.

8. Straight lines down from the inside edge of the iris will touch the side of the mouth

9. The ear is located between the eye and nose

10. The eyebrow is 1 eye height above the eye

11. The necks comes out of the head below the ears

12. The hair is higher than the top of the head.

13. In profile view, the measurement from the tear duct to the bottom of the chin is the same as the back of the eye to the back of the ear.
